Chief of Base, Minich UPSMING/DIZTAG/CART/Operational UPSMING/DIZTAG/CART/Operational UPSMING/DIZTAG/CART/Operational UPSMING/DIZTAG/CART/Operational Victoria See para. 2 Incurred 1. We read reference with interest and noted that a considerable portion of the information concerns activities of the Crech Intelligence Service, not only as directed against the Pederal Republic but also its activities in Switzerland and Prague. Since the matter also concerns two former UPSWING field agents, Viadian; and Maria PERMISKI (who were assigned field agent numbers V-4.13) and W-21545 respectively), we feel that any information passed to the RW should also be passed to UPSMING. Since there is a possibility that the BMW will pass this information to UPSMING either now or at some point in the future, we also feel that this could be potentially embarrassing to us should we not pass this data to UPSMING. 2. We therefore request approval to pass the information in reference to UPSMING. In advising them of this information concerning the source in para 2a of reference will undoubtedly be of considerable interest to both the BMV and UPSMING, and we should expect some requirements on the basis of this source description. DENNING dated 19 November 1959 Lay es/C. 1. We read reference with interest and noted that a considerable portion of the information concerns activities of the Caech Intelligence Service, not only as directed against the Federal Republic but also its activities in Switzerland and Prague. Since the matter also concerns two former MPSWING field agents, Vladiufr and Maria PEKISKI (who were assigned field agent mumbers V-4439 and V-21545 respectively), we feel that any information passed to the BUT should also be passed to the SWING. Since there is a possibility that the BET will pass this information to UPSWING either now or at some point in the future, we also feel that this could be potentially embarrassing to us should we not pass this data to UPSWING. 2. We therefore request approval to pass the information in reference to UPSWING. In advising them of this information we would also point out that the BET had been informed. The information concerning the source in para 2a of reference will undoubtedly be of considerable interest to both the BEV and UPSWING, and we should expect some requirements on the basis of this source description.
